Experience

Whats2doo / Leithold (review [↗](#))

Berlin, DE

SOFTWARE ENGINEER (INTERNSHIP)

2019 - 2020

- Designed and built a new landing page for the company website, mostly using PHP and plain JS.
- Helping to build a new web app for the company using Nuxt.js (Vue.js) and MongoDB, though to be honest, I forgot most of that already..

Fraunhofer AISEC (review [↗](#))

Berlin, DE

STUDENTISCHE HILFSKRAFT

2021 - 2024

- Did a lot of research regarding quantum computing and quantum algorithms with a focus on quantum cryptanalysis, code wasn't really the main part of the job, but I did a bunch of python using IBM's qiskit framework.
- Worked on multiple large projects including QACI, BayQS and PoQuID

Mastbau FN GmbH

Berlin, DE

LEAD FULL-STACK DEVELOPER

2021 - 2024

- Designed and built an internal application for managing the company's projects, using primarily Flutter.

Bling.de

Berlin, DE

FRONTEND ENGINEER

2024 -

- Help building the best app for families in Europe: Pocket money, banking, chores, and more, all in one place. Frontend primarily built with Flutter.

Projects

Passwort Checker [↗](#)

SOLO PROJECT

- Checks the strength of passwords using scientifically proven methods
- A simple password checker for Android as TWA
- Written in Svelte and TypeScript

Custom Vibration [↗](#)

SOLO PROJECT

- Create custom vibration patterns
- Primarily written in Flutter

Inspector [↗](#)

MASTBAU-FN GMBH, TEAM OF 2

- An inspection tool for construction sites
- Specially developed for Mastbau-FN GmbH
- Written using Flutter and TypeScript

Carii [↗](#)

GROUP OF 5

- A DiPA, WIP
- Primarily written using Flutter, with supabase and postgresql as backend

LetterBox [↗](#)

GROUP OF 15

- A mail client for iOS, for sending and receiving PGP/S-MIME encrypted emails, written with Swift
